Certified environmental protection

Toolcraft receives the certificate for sustainable environmental policy according to ISO 14001.

Georgensgmünd (D), 22/11/2021: Sustainability and environmental protection have been important components of Toolcraft's corporate philosophy for quite some time. The company from Middle Franconia takes responsibility for the preservation of our environment in order to secure the basis of life for future generations. This new 14001 certification officially confirms this philosophy from an independent source.

Investing in a resource-saving way

As a regionally rooted company, toolcraft takes responsibility for environmental protection and is willing to invest in a resource-saving way. In addition, the medium-sized company is making a sustainable contribution with energy-efficient production and investment in other long-term planned measures. In the future, toolcraft AG would like to further reduce consumption and environmental costs and at the same time use resources efficiently. In order to further expand the company's internal environmental policy, measurable environmental goals have been developed. These include the economical use of raw materials and the avoidance or reduction of emissions. Not only the employees but also all contractual partners are involved in the implementation of improved environmental protection. For these measures toolcraft AG was certified according to ISO 14001. "We are very pleased about the certificate and will make our contribution to sustainability within the framework of professional environmental management," says Karlheinz Nüßlein, Chief Officer of Human Resources and Production at Toolcraft.

About Toolcraft

The medium-sized family-owned company, located in Georgensgmünd and Spalt, was founded by Bernd Krebs in 1989. Toolcraft is a pioneer of forward-looking technologies, such as additive manufacturing and the construction of customised turn-key robotic solutions. As a provider of comprehensive solutions, Toolcraft covers the entire process chain, from the initial idea to manufacturing, quality assurance and testing in the areas of CNC machining, additive manufacturing, injection moulding and mould making. Its clients include market leaders in the semiconductors, aerospace, medical technology, optical, special machinery manufacturing, motor sports and automotive industries. Building close working relationships with collaborative partners as well as universities, other institutions of higher education and research centres is an important part of its corporate philosophy.
